

## Brenda Humberston Bio

Brenda has been in the Workers' Compensation/Loss Control/Risk Management field for 17 years. She started out her career at a Third Party Administrator which represented employers for workers' compensation. After 7 years in the workers' compensation arena, she moved onto employment with the City of Toledo in the Loss Control Section as a Safety Trainer for several divisions. Working for the City offered Brenda an opportunity to learn about many important safety aspects of both General Industry and Construction. It is through her employment with the City where she first became acquainted with Safety Day 10 years ago and is the current Chair of the Program Committee of Safety Day. Brenda has been employed at the University of Toledo for 7 years managing workers' compensation claims for the Main Campus and has recently acquired Fleet, Property, and Casualty insurance as well.

This session will be a discussion of caught-between and struck-by incidents, specifically:

- What happened?
- What could have prevented the incidents?
- How to recognize these hazards at your workplace.
- A Safety Talk guide for discussion leaders
